# MINI WALL BOX

Introducing the New  
SENKO Mini Wall Box, an  
Effective and Low Cost  
FTTH Connectivity Solution

## New Mini Wall Box

The SENKO Mini Wall Box is designed for FTTH applications, allowing for easy and multiple position installations.

## Simple Installation

The Mini Wall Box is designed for indoor environments, requiring fiber optic connectivity. The Mini Wall Box is easy to install and has multiple cable entry positions. Direct termination or pigtail splicing for 2 - 4 fibers.

## Controls Bend Radius to Minimize Insertion Loss

When used in conjunction with the SENKO XP Fit Plus field installable connectors the solution yields exceptionally low insertion loss especially suited to singlemode applications.

## Mini Wall Box
